

# A UNIQUE SPONSORSHIP OPPORTUNITY

## THE FUTURE of CANADA-US "INTEGRATION"

Some Canadians argue that Canada's integration with the US is necessary and inevitable. Others insist that Canada should strive to maintain its independence. The University of Victoria's Centre for Global Studies (CFGS) is partnering with CBC Newsworld to host an innovative exploration of the future of the Canada-US relationship.

### A CONFERENCE WITHOUT WALLS

Four key aspects of Canada's relations with the US will be discussed at a Nov 26-28 conference at UVic: **security, water, energy** and **economic integration**. Well known experts in each of the four fields will present a spectrum of views (see page 2).

### BROADCASTING COAST TO COAST TO COAST

To "go public" with this debate, CBC Newsworld will air four hour-long television specials in December. The fourth program will feature an interactive exchange on the issues in a live 'town-hall' type forum.

### BRINGING FUTURE DECISION MAKERS ONLINE

To involve young Canadians, the project will host an essay competition, and will bring students under the age of 25 to the conference. CBC Newsworld will also host an interactive website to encourage more debate about the future.
